➤ Description of the Service

I provide a full, structured and professional portfolio design service, but I only cover the look and user experience part of your portfolio.

This includes a modern and coherent as well as a tidy UI/UX design that satisfies the factors of usability, visual hierarchy and branding.

Designing the entire page interface, including the structure of the page, color scheme, font, and choosing a unified visual identity that suits a professional level.

The deliverable of the task is a completed design file, and can be further prepared for presentation as a portfolio website in the next task.
